**Fast T3.0**  
USB Hub

Slim 4-Port USB 3.0 Data  
Hub with USB 3.0 Interface

# AN EXQUISITE PIECE OF ART

Fast T3.0 USB Hub is like no other Hub!

It stands out with its sophisticated design, gorgeous rounded corners and elegant Piano finish. All this coupled with a rich royal blue colour makes it a sight to behold!

# PRODUCTIVITY

# X4 WITH FOUR ADDITIONAL PORTS

Fast T3.0 USB Hub turns a single 3.0 USB port from your laptop into four ports that can be used simultaneously for data management and quick device charging. It can connect an extensive range of peripherals from keyboards and printers to hard drives, consoles, smart phones and much more.

The built-in safety protection technology against over-current, over-voltage, short-circuit and leakage lets you work peacefully knowing that your devices are working in the safest manner possible even during intense workloads.

# SIMPLE PLUG AND PLAY SETUP

Simply plug the Hub into the USB port of your computer/laptop and enjoy instant access to 4 ports so you can forget about repeatedly unplugging devices. For maximum compatibility, this USB hub functions seamlessly with all versions of Microsoft® Windows®, Chrome OS, MAC OS, Android and Linux.

An isometric illustration on a dark blue background with glowing circuit lines. In the center is a black 'fingers' brand USB 3.0 hub with a USB-A to USB-C adapter plugged into its top. To the left is a smartphone, and to the right is a laptop, both displaying data on their screens. Several stacks of server hard drives are positioned around the central hub. Blue arrows indicate data flow from the smartphone and laptop through the hub. The background is filled with stylized circuit patterns and glowing blue lines.

# SUPER QUICK DATA TRANSFER

With twice the speed of USB 2.0, transfer high-definition movies, vacation images, favourite songs and more with rapid transmission speed of 5 Gbps. And because you can transfer large work files in the blink of an eye, you will end up spending less time syncing and more time working (or chilling).

# ULTRA-PORTABLE. DURABLE.

Its slim and compact design easily fits in the palm of your hand and can slip into any pocket or computer bag. With no compromises on durability, the hub has been crafted with high-quality materials and sturdy cable.

# Fast T3.0

## USB Hub

**Slim 4-Port USB 3.0 Data Hub with USB 3.0 Interface**

**Plug and play**  
(No drivers required)
